CAMPUSHIRE

Understanding the Problem

Traditional campus placement management is fragmented, manual and difficult to monitor end to end.

Scattered Information

Student details, company information and placement records are maintained in different spreadsheets and files.

Manual Tracking

Applications, interview schedules and selection status are updated manually.

Repeated Data Entry

The same student and company information may be entered multiple times.

Manual Notifications

Registration confirmations and placement updates require manual communication.

Lack of Centralised Monitoring

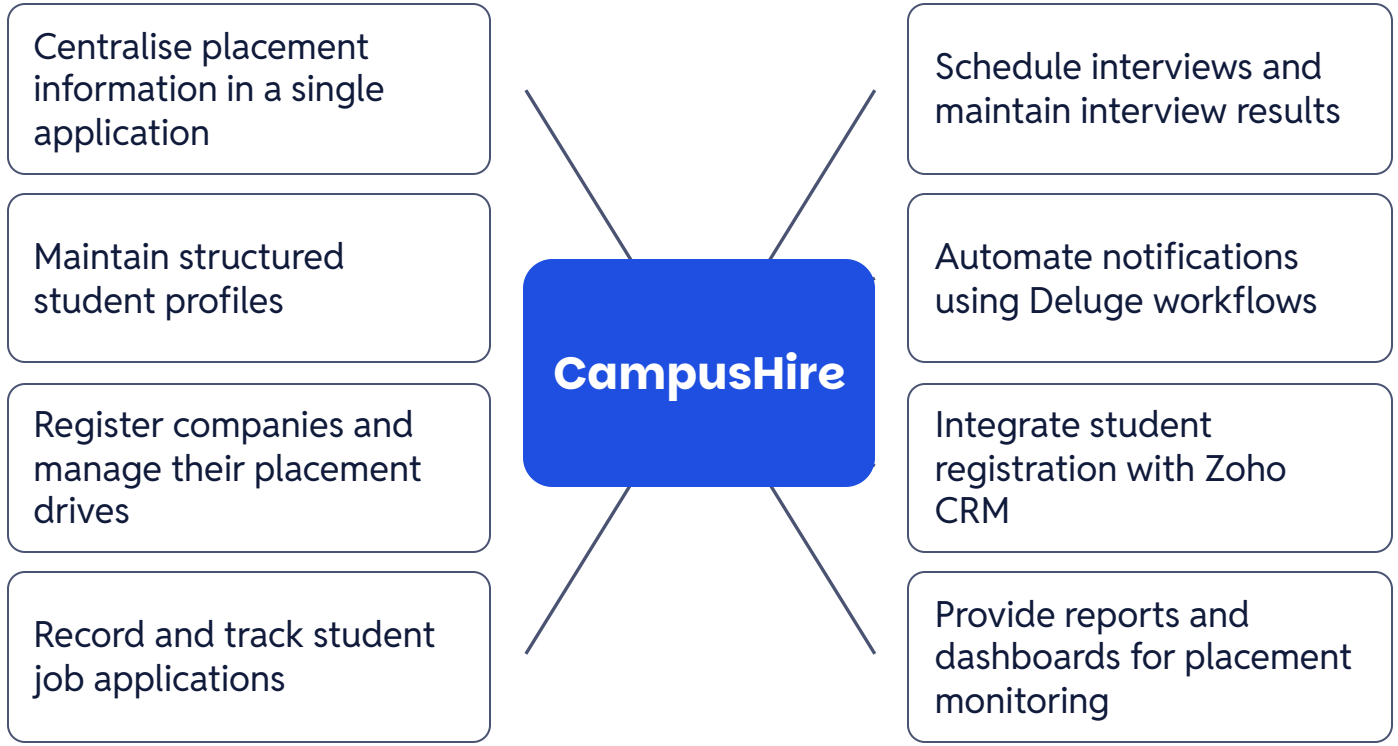

No single consolidated view of students, companies, drives and interviews.

PLATFORM

Why Zoho Creator?

A low-code platform supports fast form creation, structured reporting and workflow automation with limited custom code.

Technology: Platform: Zoho Creator · Scripting Language: Deluge · Integration: Zoho CRM

Made with GAMMA

SYSTEM ARCHITECTURE

Five Core Modules of CampusHire

Student Registration

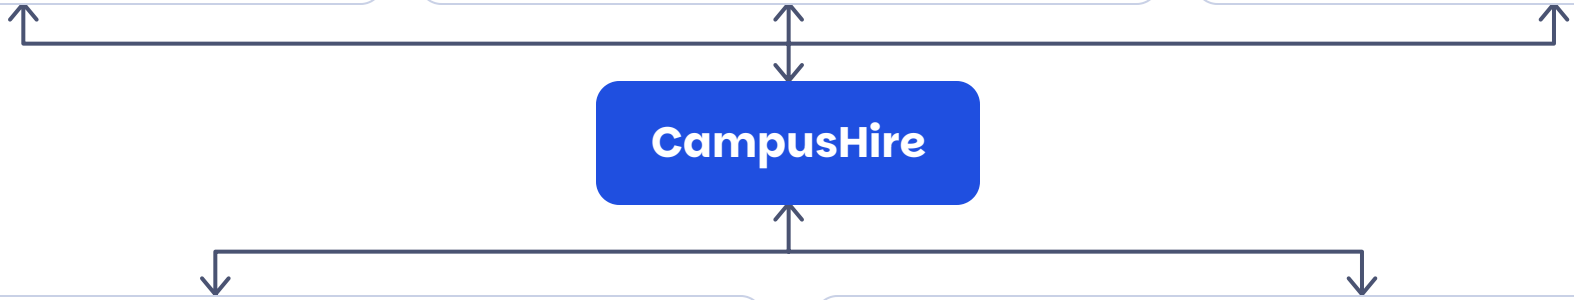

Student name, register number, contact details, department, year, CGPA, skills, certifications, resume and job preferences

Company

Company name, industry, e-mail, HR contact details, location and website

Placement Drive

Job role, company, location, minimum CGPA, required skills, salary package, deadline and drive status

Job Application

Student, selected drive, application date, application status and remarks

Interview

Student, company, job role, interview date and mode, round, status and result

Made with GAMMA

PLACEMENT LIFECYCLE

How Does CampusHire Work?

Register Students and Companies

Capture profiles through structured forms

Create Placement Drive

Add role, eligibility, package and deadline

Student Applies

Record the job application against the selected drive

E-mail Notification

Trigger a notification when the relevant form is submitted

Schedule Interview

Record the interview date, mode and round

Update Results

Update interview result and application status

Reports and Dashboard

View registrations, placement status, applications and interviews

Made with GAMMA

AUTOMATION

Making Placement Management Smarter

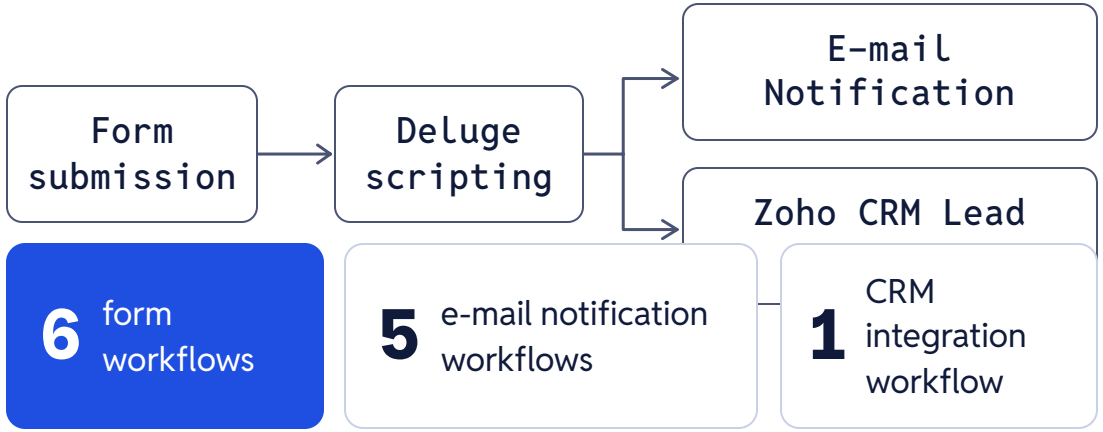

Deluge scripting and Zoho Creator workflows connect form submissions to timely actions.

E-mail automation:

Student Registration confirmation; Company Registration confirmation; Placement Drive notification; Job Application confirmation; Interview scheduling notification.

Zoho CRM integration:

Student registration data creates a lead in Zoho CRM; student name, e-mail and phone details are mapped to the CRM lead; the CRM workflow runs when a student record is added or edited.

Technology:

Deluge scripting + Zoho Creator Workflows + Zoho CRM.

Workflow structure:

6 form workflows — 5 e-mail notification workflows and 1 CRM integration workflow.

VISIBILITY

Monitoring Placement Activities

Reports and dashboards provide a consolidated view of placement records and progress.

9 reports

All Student Registrations; All Companies; Placement Drive Report; All Job Applications; All Interviews; Student Details Report; Company Details Report; Job Application Tracking Report; Interview Tracking Report.

Dashboard count cards

Total Registered Students; Total Registered Companies; Active Placement Drives; Interviews Scheduled.

Charts

Placement Status — Donut Chart; Application Status — Column Chart.

Benefit: The placement team can review important records, track activities and monitor placement progress through a consolidated dashboard.

ROADMAP

What's Next for CampusHire?

Advanced Lookup Relationships

Connect student, company and placement drive records through lookup fields for better data consistency.

Automatic Eligibility Verification

Check student CGPA, backlogs and skills against placement drive requirements.

Student Portal

Let students access profiles, explore drives and track applications.

Company Portal

Let companies manage recruitment information and placement drives.

Deadline Reminders

Send automatic reminders for upcoming application deadlines and interviews.

Enhanced Analytics

Introduce department-wise placement reports, placement percentages and package-wise charts.
